

FREE HOME ENERGY CHECK FOR YOU

A TALE OF TWO NEIGHBOURS

Transition Buxton's thermal imaging camera has shown that the semi on the left is losing lots of heat through its walls *and that means money.*

Now look at the neighbour on the right, that purple colour shows far better insulation which means they are warm and snug inside yet paying lower energy bills.

Turn over to learn how we can help you to help yourself – and the planet.

Buxton**

Towards a sustainable community

What's involved?

It's very simple. Our trained energy assessors will arrange a suitable time to visit then they will check what insulation you already have (if any) look at your energy utility bills and suggest what could be improved and any grants that might be available to help. The whole visit will take about an hour.

What's the catch?

Actually there isn't one. We are not remotely interested in selling you anything, we do not want you to pay us anything and you are under no obligation to take any action following our suggestions.

So why are you doing it?

This is just one of a number of projects that Transition Buxton is carrying out to make our town greener. Projects range from planting trees, encouraging more recycling right through to setting up large solar electricity generating plants. If we can help you save money on your heating we know we are also helping to save the planet. It's a win-win situation.

So how do I get involved?

Go to:

www.transitionbuxton.co.uk/home-energy

and fill in the simple, on-line form or email

heatloss@transitionbuxton.co.uk

and we will be in touch. We hope that will give you a warm feeling!
